DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2 and 20, drawn to an advancing mechanism, classified in class 83, subclass 573.
 - II. Claims 3-7, 22-23 and 24, drawn to a plurality of rails, classified in class 83, subclass 786.
 - III. Claims 9-12, 16-17 and 18, drawn to a pivot support, classified in class 83, subclass 632.
 - IV. Claims 13 and 28, drawn to a pulley assembly, classified in class 83, subclass 814.
 - V. Claim 19, drawn to a motor, classified in class 83, subclass 617.

Claims 1, 14-15, 25-26 and 27 has features of none of the subcombinations and will be examined if any groups are elected. If any of claims 1, 4-15 and 25-27 are ultimately determined to be allowable in their current form, claims dependent therefrom may be rejoined.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of groups I-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the plurality of rails of group II

could be used with out the a pivot support of group III, and conversely, the pivot of group III could be used with out the plurality of rails of group II. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention: Species I: Embodiment of Fig. 1-14; Species II: Embodiment of Fig. 15-20 .

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, some claims may be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Omar Flores-Sánchez whose telephone number is 703-308-0167. The examiner can normally be reached on Monday thru Thursday between 8am and 5pm. If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 703-308-1082.

In lieu of mailing, it is encouraged that all formal responses be faxed to 703-872-9302. Any inquiry of a general nature or relating to the status of this application should be directed to the receptionist whose telephone number is 703-308-1148.
